THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please **CANCEL** claim 3.

Please change the status identifiers of **claims 6 and 7** from "Withdrawn" to "Original".

Please **CANCEL** claims 8-11

END EXAMINER'S AMENDMENT

Allowable Subject Matter

2. **Claims 1 and 4-7** are allowable. The restriction requirement among species I-X, as set forth in the Office action mailed on 6/27/2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 6 and 7 are no longer withdrawn from

consideration because the claim(s) requires all the limitations of an allowable claim.

However, **claims 3 and 8-11**, directed to a non-elected species, are withdrawn from consideration because they do not require all the limitations of an allowable claim.

3. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. This application is in condition for allowance except for the presence of **claims 3 and 8-11** directed to a non-elected species without traverse. Accordingly, **claims 3 and 8-11** have been cancelled.

6. The following is an examiner's statement of reasons for allowance:

7. A claim limitation will be presumed to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis:

(A) the claim limitations must use the phrase "means for" or "step for";

(B) the "means for" or "step for" must be modified by functional language; and

(C) the phrase "means for" or "step for" must not be modified by sufficient structure, material, or acts for achieving the specified function.

Additionally as stated in MPEP 2181:

Where a claim limitation meets the 3-prong analysis and is being treated under 35 U.S.C. 112, sixth paragraph, the examiner will include a statement in the Office action that the claim limitation is being treated under 35 U.S.C. 112, sixth paragraph. However, if a claim limitation does not use the phrase "means for" or "step for," that is, the first prong of the 3-prong analysis is not met, the examiner will not treat such a claim limitation under 35 U.S.C. 112, sixth paragraph.

6. Thus, all limitations which include "means for" language presented by independent claims 1 and 4-7 have been examined under the 35 U.S.C. 112 sixth paragraph standards. Additionally, limitations (for example "an A/D converter" of claim 4) which do not recite "means for" language have been examined given there broadest reasonable interpretation.
7. In view of this, with respect to **claim 1** the prior art is not found to teach or fairly suggest, a video camera comprising: an image sensor for converting incident light into an electric signal; first means for converting the electric signal generated by the image sensor into a digital video signal; a memory having a first storage area for storing segments of the digital video signal generated by the first means on a frame-by-frame basis; second means for detecting a shake of a camera body, and generating an analog detection signal representative of the detected shake; an amplifier for amplifying the analog detection signal generated by the second means to generate an analog amplification-resultant signal; third means for converting the analog detection signal generated by the second means and the analog amplification-resultant signal generated

by the amplifier into a digital detection signal and a first digital amplification-resultant signal respectively; fourth means for amplifying a signal value represented by the digital detection signal generated by the third means on a digital basis to generate a second digital amplification- resultant signal; fifth means for deciding whether or not values represented by at least two successive samples of the first digital amplification-resultant signal are greater than a predetermined reference value; sixth means for selecting the second digital amplification-resultant signal when the fifth means decides that the values represented by the at least two successive samples of the first digital amplification-resultant signal are greater than the predetermined reference value, and selecting the first digital amplification-resultant signal when the fifth means decides that the values represented by the at least two successive samples of the first digital amplification-resultant signal are not greater than the predetermined reference value; seventh means for generating a shake corrective signal in response to the signal selected by the sixth means; eighth means for reading out segments of the digital video signal from a second storage area movable within the first storage area of the memory to generate a correction- resultant video signal; and ninth means for moving the second storage area relative to the first storage area in response to the shake corrective signal generated by the seventh means.

8. Additionally, with respect to **claim 4** the prior art is not found to teach or fairly suggest, a video camera comprising: first means for detecting a shake of a camera body, and generating a first analog signal representative of the detected shake; second means for subjecting the first analog signal generated by the first means to linear

operation with first and second gains to generate second and third analog signals respectively, the second gain being higher than the first gain; an A/D converter; third means for feeding the second analog signal and the third analog signal alternately to the A/D converter onto convert the second analog signal and the third analog signal into a first digital signal and a second digital signal respectively; fourth means for deciding whether or not the A/D converter is saturated by the third analog signal; fifth means for selecting the first digital signal and discarding the second digital signal when the fourth means decides that the A/D converter is saturated, and selecting the second digital signal and discarding the first digital signal when the fourth means decides that the ND converter is not saturated; and sixth means for generating a shake corrective signal in response to the signal selected by the fifth means.

9. Claims 5-7 are allowable for at least the reasons that they depend from **claim 4** which is allowable for the reasons discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
